

WATERMELON

September 2017

How to Pick a Watermelon

A good watermelon, round or oval, has a symmetrical shape.

Good watermelons will not have soft spots. ★

Dark green melons tend to be sweeter than those that are lighter in color.

Watermelons are more than 90 percent water, so the juicy melons are going to be the ones that seem heavy for their size.

Did You Know?

Watermelon is the top agricultural crop in Texas and our state ranks 3rd in U.S. production. Over 42,000 acres of watermelon are grown throughout Texas over 100 counties. Locally grown watermelon can be found all over Texas, especially in the summer months.
